Lifetime Furniture

IN issuing this Catalogue of Household Furniture and Accessories to our Country Patrons, we would emphasise the fact that it is only possible in a publication of this kind to mention a tithe of the magnificent selection which constitutes our stocks. Still, a generous choice is herein submitted, and should patrons not see exactly what they want depicted here, if they will write and state their requirements, we will undertake to supply them to their satisfaction.

The accompanying key will give the prices of the various articles illustrated. Prices, of course, are above normal, but in every instance care has been exercised to keep down the costs as much as possible, consistent with quality and workmanship.

Should you prefer to deal on Terms, the advantages of our "Gradual Payment System" are entirely at your disposal.

All goods are packed by experienced men, and are despatched by rail, steamer, or road according to your instructions.

We do NOT pay freight on Furniture, Bedsteads, Bedding, Carpets, Floorcloths, Ironmongery, Crockery or other bulky goods.

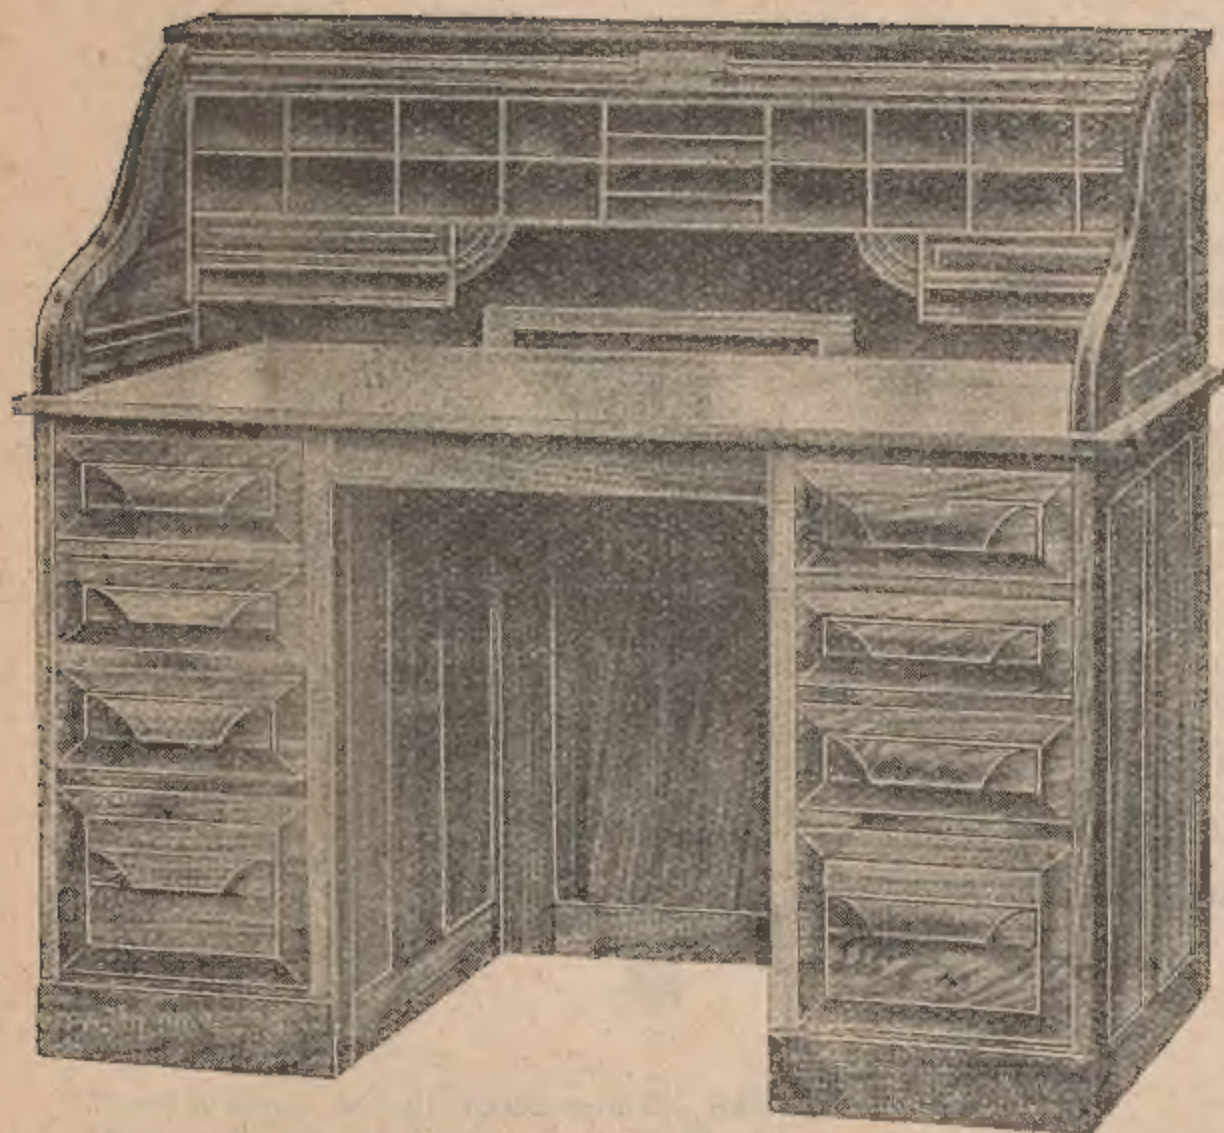

NOTE:- The prices in the key hold good until present stocks are exhausted.

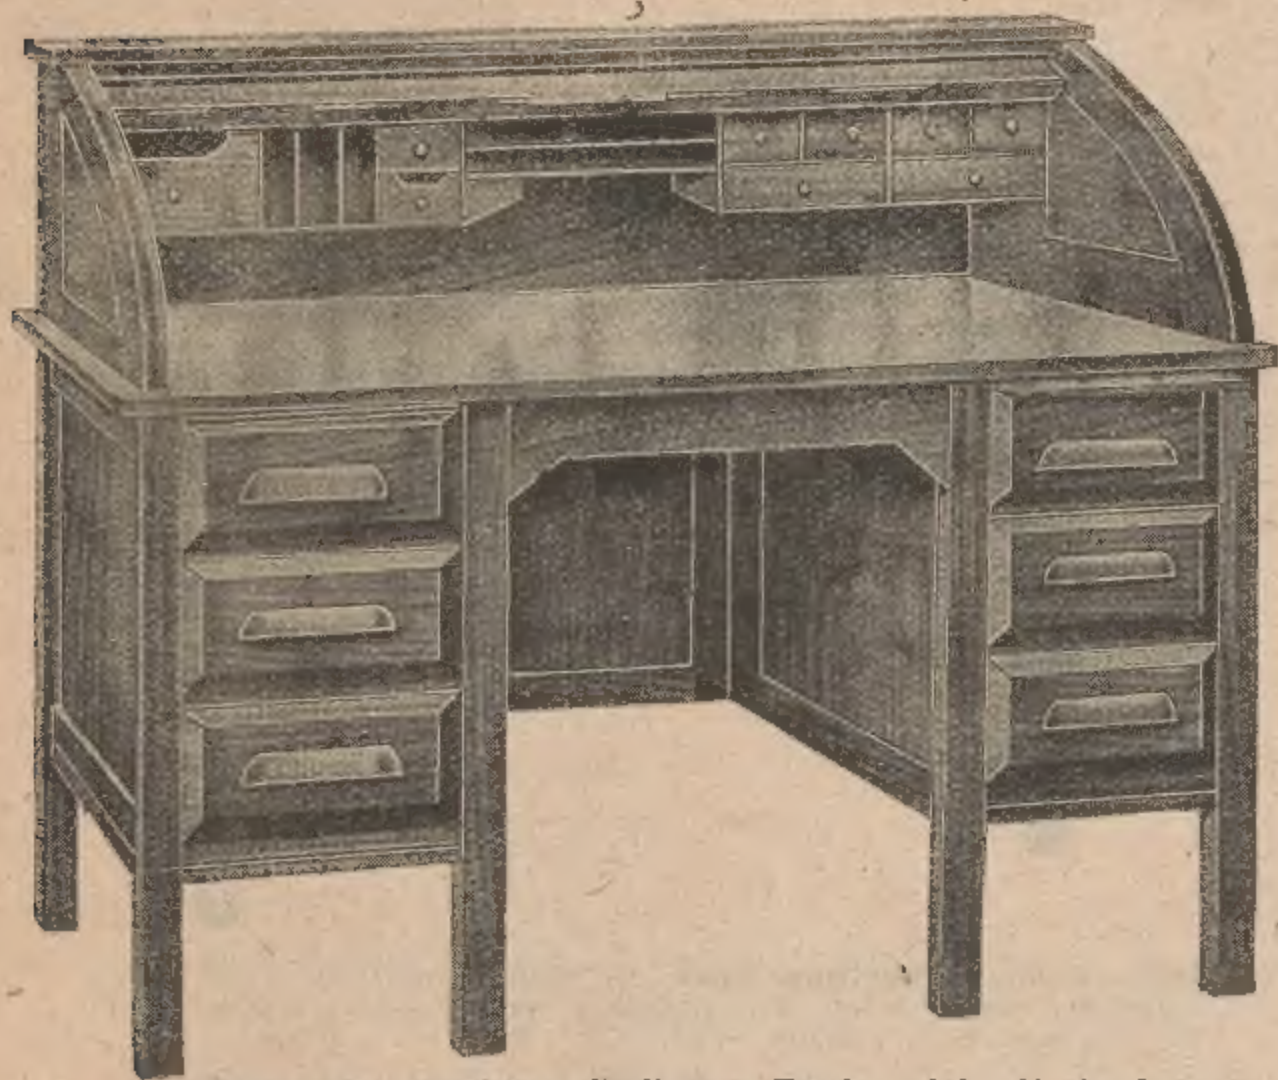

Marcus Clark & Co., Ltd.,
Complete House Furnishers.

SCALE

A very fine instrument, made by one of the oldest and most progressive Piano-makers. It is an Upright Grand Model, in rich dark Walnut Case, Full Trichord, Extended Iron Frame, Four Metal Standards, Rivetted Hammers, Extended Sound Board, Ivory Keys, seven and one third Octaves.

This Instrument responds to every gradation of the player's touch instantly and accurately, while its tone is not only sweet and pleasing, but full and resonant.

The No. 1 has three pedals, the useful third giving charming tone effects, subduing noise of practice and preventing wear and tear.

F7193—Comfortable Morris Chair, upholstered in best quality Huxine; spring back and seat. Frame made of Solid Oak.

Sole Agents for New South Wales for the

THE TRIUMPH OF OIL!
BRITISH INVENTION BRITISH MADE

“Blanchard” Self-Contained Portable Lamps

100 TO 1,500 CANDLE POWER

THESE lamps are made with the Oil Container separated from the Burner, consequently the Oil cannot become overheated. The construction of the Container is such that it is impossible for the flame to enter it, or to come in contact with the oil.

In small Lamps a Pump is fitted to the Container to supply Air Pressure.

In large Lamps a Valve is fitted which enables a hand or bicycle Pump to be used for supplying the air pressure. The orifice into which the Pump or Valve

is fitted provides, when removed, a large opening through which the Container is filled with oil.

The Oil is forced from the Container to the Burner through a very small tube by the air pressure produced by pumping.

The Burner is provided with a needle, worked from the outside of the Lamp, for clearing the jet orifice of particles of solid matter when necessary.

To light the Lamp, the heat necessary to vaporise the oil is derived from the burning of a small quantity of methylated spirit beneath the Burner. Afterwards the required heat to keep the Lamp alight is supplied by the combustion of the oil in the Burner.

.. The ..

“Blanchard” Self-Contained Portable Lamps

Consumption of Kerosene.

The “Blanchard” Lamp, whilst giving 500 candle-power, consumes one gallon of oil in thirty-two hours.

The “Blanchard” Lamp has proved itself to be the most economical means of modern lighting, and provides a more natural light than either Electricity or Coal Gas.

Renewal of Mantles.

Oil vapour is not so destructive as gas upon incandescent mantles. The average life of mantles specially manufactured for the “Blanchard” Lamp is 500 hours or 100 days averaging five hours each.

Advantages.

There is no Smoke or Smell, and absolutely no danger from explosion.

The “BLANCHARD” LIGHT can be adapted to all kinds of illumination, and for all purposes both indoor and outdoor; and it can compete successfully with the most up-to-date and advanced Incandescent Gas or Electric Lighting.

Various designs of Lamps are in preparation for Private Indoor Lighting, which can be adapted as Central Hanging or Side Bracket Lights in Domestic Apartments, Rooms and Vestibules; either self-contained or supplied with oil from one or more detached reservoirs, as may be convenient.

Duplex or Two-Burner Lamps

for Shops, Yachts, Cabins, Bungalows, and Low Rooms.

 These Curtains can be made to fit any size window required.

Mosquito Nets.

When Ordering Mosquito Nets for half tester bed it is advisable to send the size of the bow; this can be easily obtained by taking the bow off the bed and placing it on a piece of paper and cutting to shape. For four post bedsteads, give the length as well as the width at the top. For Italian bedsteads, give the width of the bed and length of side rails.

Mosquito Nets, plain, for half-tester or Italian bedsteads.

2ft. 6in.,	4ft. 6in.
3ft.,	5ft.,
3ft. 6in.	

Mosquito Net, by the yard.

90in.,	120in.,
108in.,	140in.,

Camp Mosquito Nets—

Mosquito Nets, plain for four post Bedsteads.

2ft. 6in.,	4ft. 6in.
3ft.,	5ft.,
3ft. 6in.	

Mosquito Curtains Made to Order. In fine, good quality net, to open in front, trimmed with frill of lace. Made for half-tester or Italian bedsteads. With trimmed lace front—with lace trimming and ruche and valance.

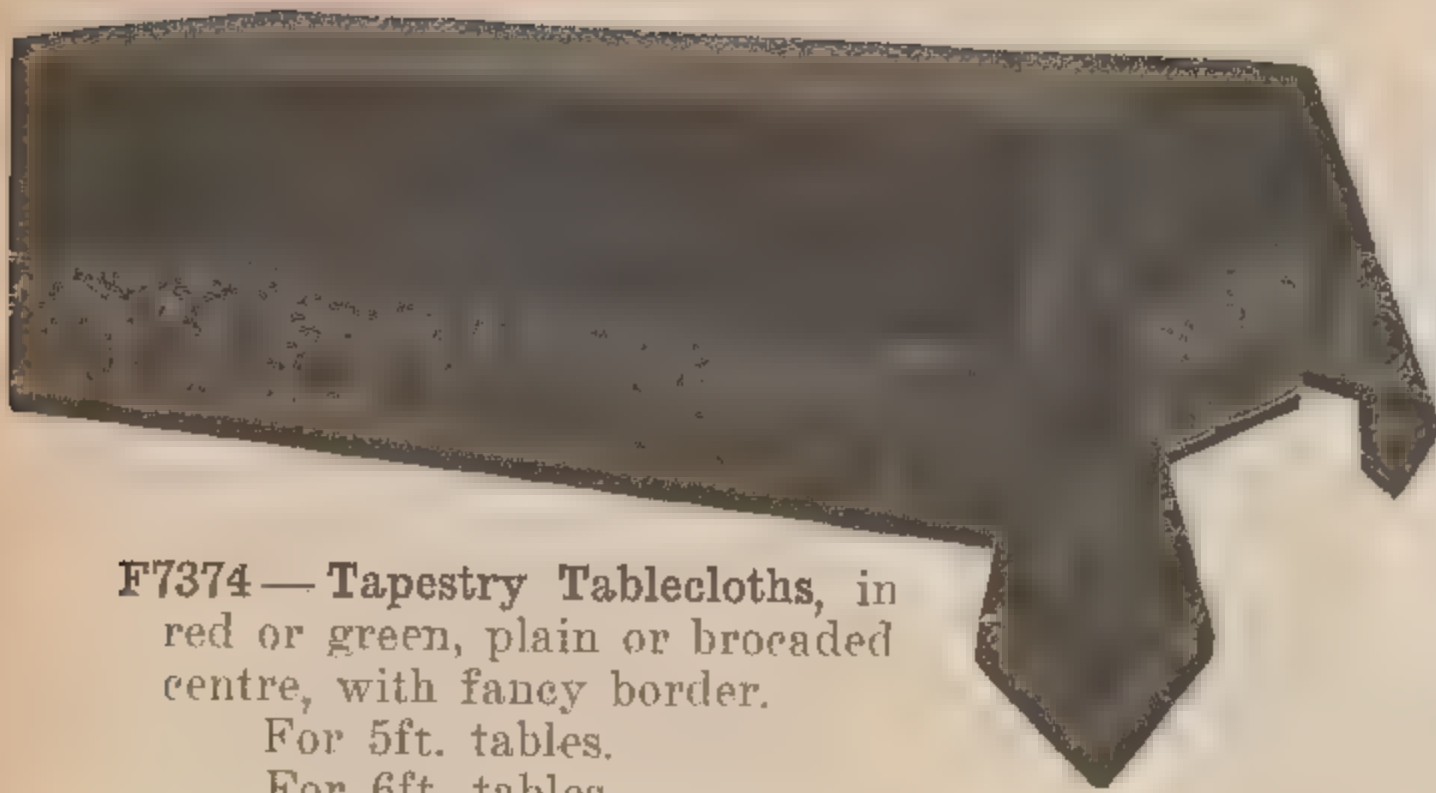

PLEASE NOTE.—As trade has not yet regained the normal, we may not be able to replace certain lines when sold out, therefore, it would be advisable for you to make a second choice where possible.

We Pay Carriage on all goods illustrated or priced on this Page.

For Prices please refer to the key which accompanies Catalogue.

You

*should have an improved
"New Century" Sewing
Machine.*

Because

We offer you a Family Sewing Machine at a moderate price.

It is the latest production in Sewing Machines.

It is the outcome of brains and mechanical skill.

It will last a lifetime, and do any class of work, from the finest to the coarsest.

It is the highest grade machine at a moderate cost. It is light running and silent, and all parts are interchangeable. It appeals to those who desire something rich and ornamental as well as useful.

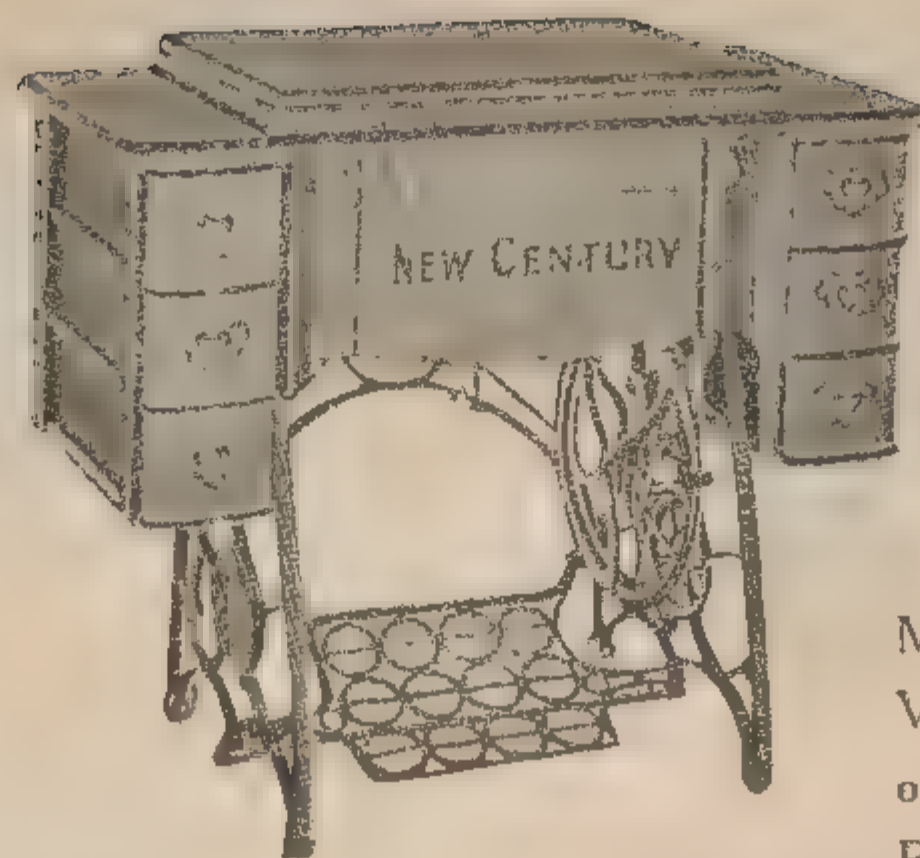

It has our lifetime guarantee and we always keep our customers satisfied.

The "New Century" Head is the best vibrating Shuttle Machine that brains and money can produce. Our long experience taught us the weak points of machines, and we profited thereby. When you want a machine, carefully examine the "New Century."

An ideal Sewing Machine to ensure lifetime satisfaction.

We Pay Carriage on Sewing Machines to your nearest Railway Station or Wharf.

AND

2/6 Per Week

Reasons Why

You should see and buy
the World's Best Sewing
Machine—

The "New Century."

It runs far more quietly, decidedly easier, and faster than is possible with any other style shuttle.

It makes the prettiest and most elastic stitch. The tension is released automatically when the presser foot is raised.

The shortest needle used in lockstitch machines, therefore, will not bend and skip stitches.

Tension not changed by change of speed, size of thread, thickness of goods, nor length of stitch. What other machine can do as much?

Best ball-bearing stand, fitted with cone screws to take up wear—practically indestructible.

Feed motions are positive—no springs used. Hence machine will feed over all thicknesses of goods and seams without "chewing" the cloth, no matter what length of stitch.

Will wear twice as long as any other lockstitch machine. Saves a lot of time and worry. You get more for your money in the "New Century."
